

Factsheet: Nagelmackers Eurozone Small & Mid Cap Fund

Monthly reporting on 11/30/2024

Open-ended fund

Category: Europe Small & Mid Cap

NAV: 141.79 EUR

Morningstar Rating™: ★ ★ ★

Morningstar is an independent provider of investment analyses. The Morningstar Rating of ★ to ★★★★★ is a quantitative evaluation for the past performances of an investment fund, taking into account risk and settled expenses. It does not take into account qualitative elements and is calculated on the basis of a (mathematical) formula. The investment funds are ranked by category and compared with similar investment funds based on their score and are given one to five stars. In each category, the top 10% highest scores get 5 stars, the next 22,5% 4 stars, the middle 35% 3 stars, the next 22,5% 2 stars and the worst 10% 1 star. The rating is calculated monthly based on historical returns over the past three, five or ten years and does not take into account the future. Compartments that have not yet existed for 3 years will not receive a rating. For more details on the calculation methodology, please refer to <https://www.morningstar.com/views/research/ratings>.

Objective

Nagelmackers Equity Small & Mid Cap Fund seeks to maximize returns through long-term capital appreciation by investing in mid and small cap stocks. The fund invests mainly in small and mid-caps, a balanced selection composed of promising niche players with innovative added value, as well as a group of industrial first-class quality companies that boast a distinctive business and earnings model that have already proven their added value. These companies are highly active at the international level. Through a bottom-up stock picking approach - in-depth fundamental and value analysis - stocks are selected for inclusion in the portfolio. The focus is on earnings growth, value creation (return on equity) and balance sheet health.

The fund may use derivative financial instruments for downside risk hedging or return optimization purposes.

No benchmark is used for this fund, and it is actively managed.

The fund's dividend income is reinvested.

You can buy or sell shares in the fund on any banking day. Only in exceptional cases, redemptions can be limited or postponed. This is always done in the interest of the existing shareholders of the fund.

Recommendation: This fund may not be suitable for investors who plan to withdraw their money within 7 years.

This investment policy is taken in full of the Key Investor Information Document. Capital and/or returns are not guaranteed or protected.

The decision to invest in the UCI must take into account all characteristics and objectives of the promoted CIU: this fund is SFDR art. 8

In case of capital loss, no withholding tax is due.	

* Exemption for non-residents provided that the required declaration is signed.

Lexicon

HIGH YIELD BONDS: Fixed income securities issued by companies with poor credit ratings. They offer higher returns, but are associated with greater risks for investors.

EMERGING MARKETS HARD CURRENCY: fixed-income securities of any type of issuer in emerging countries, issued in hard currency (USD or EUR)

FIXED INCOME: Fixed rate investments, such as bonds and cash.

INVESTMENT GRADE: A credit rating for fixed-income securities, by which the rating agencies certify good to very good creditworthiness. This means a rating of BBB- or higher by Standard & Poor's or an identical rating by Moody's or Fitch. For these bonds, it is assumed that the risk of default is lower than for bonds with a low credit rating. "Default" refers to a company that is no longer able to make interest payments or repay the original investment.

VOLATILITY: The change in the price of a financial instrument or the market as a whole. The higher the volatility, the greater the risk the greater the risk to the investor.

SOLVABILITY (RATING): A measure of the ability of a person, state or company to pay its debts. The higher the creditworthiness, the easier it is to obtain loans from third parties.

SWING PRICING: Swing pricing is a technique used to eliminate the negative impact on the net asset value of a fund or sub-fund caused by the entry and exit of participants in that fund or sub-fund. This technique aims to protect participants in the fund or sub-fund who do not want to leave. In practice, it is the incoming or outgoing participants who bear the costs generated by their transactions.

OTHER: "Other" on a chart refers to instruments that are not included in the applied allocation.

EMERGING MARKETS: Les pays émergents sont des nations où l'activité sociale et entrepreneuriale se développe rapidement et qui sont sur la voie de l'industrialisation.

ANTI-DILUTION LEVY: The fund may choose to charge an additional entry or exit fee. This is only possible when a predetermined threshold is exceeded. The proceeds of the fee are allocated directly to the fund.

SFDR: The Sustainable Finance Disclosure Regulation (SFDR) is a European regulation introduced to improve transparency in the market for sustainable investment products, to prevent greenwashing and to increase transparency around sustainability claims made by financial market participants.

maturity breakdown: (Graphical) breakdown of bond maturities

breakdown by rating: (Graphical) distribution of bond ratings in the fund's portfolio.

Legal information

- The term "fund" should be understood to mean an open-ended investment company (with variable capital), or a sub-fund of an open-ended investment company, or a mutual fund.
